

Meeting Agenda

Location:Linsen Restaurant

Date:21th of march

Time:11am-12pm

Facilitator: Tomas Selldén

Participants:Tomas Selldén, Henrik Andersson, Anton Palmqvist and Marcus Tyrén

1.Objectives (5 min)

We don't know if we are going to use our old repository where we did some testing or create a new one (perhaps with a better name), with a risk that it will take some extra time.

2.Reports (15 min)

We decided at last to use Slick2D as our framework instead of Pulpcore. Git now works for everybody including sharing code from eclipse. We still have some difficulties to share the framework-settings properly, but it works anyway. Our domain-model was completed in time as well as the UseCase for Move. We all have gather knowledge about Slick2D framework and also practiced some tutorials.

3.Discussion items (35 min)

1. We are keeping up to the courseplan and we aim to start the work on the basic design-model this week.
2. Start sketching on a design-model so we can ask for feedback on the weekly meeting with our mentor. Continue with the RAD as instructed on the course-website.

4.Outcomes and assignments (5 min)

1. Everybody is involved in the making of the design-model.
2. Tomas tries to book us a group-room,preferably with a whiteboard.
3. Also we all work on the RAD.
4. Book a room for the next meeting on monday.

5. Wrap up

1. Next meeting monday ,26/3, during lunch.
